The present invention is directed to a method and apparatus for protecting against unauthorized decryption of an encrypted cryptographic key. Each independent claim (claims 1, 25, 45 and 47) identifies the uniquely distinct feature of using an address-limited port that prevents key re-transforming information and a cryptographic key from being addressed. The closest prior arts, Spies et al., Shona et al., Jaffe et al., Otway et al., Novoa et al. and Richards fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
